Bringing together data science leaders for a day-long exploration of emerging practices and technologies.

We've visited 6 cities, invited over 150 speakers and hosted over 1500 data science professionals at Data Science Popups in the last two years.

We've collected extensive data to figure out just the right mix of people and content to make data popups as seamless as possible. We look forward to having you be part of our growing family.

Establishing a face and presence for your brand not only strengthens your influence but also raises awareness, and your credibility.

> *"Data science popup is smaller, more intimate conference alternative, to help fill that need for the data science community to get together from time to time."*
>
> **Dylan Tweney**
> *Former Editor-in-Chief VentureBeat*

Be a Speaker

Raise your profile & establish thought leadership for your business. Join the most influential leaders in data science and share your knowledge about the latest machine learning techniques and interesting case studies. Data Science Popups bring together twenty-five speakers per event. With a full day of diverse content there's plenty of opportunities to share your knowledge, attract new hires and make lifelong business connections.

Speaking opportunities require sponsorship. Content is subject to review and direction by the conference organizers.

Be a Sponsor

Be a thought leader and increase the awareness of your brand. You'll be at the forefront of the most lucrative conversations around data science in SF, NYC, LA and Chicago. Meet and greet qualified buyers and highly qualified new hires, strengthen existing relationships and cultivate new ones. Sponsors receive a speaking spot or sponsored workshop depending on sponsorship level. All sponsors will have access to the showcase area during the duration of the event.

This area is where attendees can try out your solution or products, experience your platform, and immediately get a clear understanding of your value.* More than two-thirds of attendees are involved in purchasing decisions.

Past Speakers & Sponsors Involved

> "*Domino data science pop-up exceeded our expectations! We no only showcased our product but also had intimate conversations with many qualified buyers*"

Emilio Caamano
Solutions Architect Cisco

> "*Domino data science pop-up is a new intimate data conference that the industry was missing.*"

Roger Magoulas
Research Director, O'Reilly Media
